Alexander Brass Band - High Peak

Secure start - perhaps just a touch more delicate from the 'glittering' cornets? ② - great Flug sound, and the music lifts well. Aspiration - well done cornet - euph arpeggios could be smoother. This is generally well shaped. Fugato - well balanced & stylish, though as it continues we do lose some of the semi-convex work in the texture. Ascent - Stylish from euph/baris. Tuning bar before [10] or at [10] is suspect. Also some fragile pitching. [11] - nice brass team/bass mix. PP could be more of a risk, as could the fff? Nice 'storm' section - well painted picture. Again dynamic peaks could take a touch more sound. [16] +4 - nice moment. Beautiful stuff, but be really precise with ensemble (block harmony needs to move together e.g. 3 before [17]).
Strong finish. Lots to enjoy - small individual slips & lack

Bergen 8. - 9. februar 2013

of full dynamic range - but still quality playing on a often underestimated piece.
