2. DIVISJON

Spiller som nr ^{4.} Alexander Brassband. Poeng 90

Opening is generally well-handled with only the occasional insecure moment - balance is sometimes a challenge, but lovely trombones at 2S!
3/8 tight band playing, good. More transparency would enhance this further.
II Effective and contrasting timbres. Nice flugel playing especially - great shaping.
Solo insecurities creep in but band effects are OK.
III Good energy although it is not in complete control (pitch/technique).
IV All voices heard; bold playing if occasionally forced in sound. Beautiful trombone tone at 371! Nicely handled transition. Good pacing to continue as well into...
V. Balance is an issue (especially between brass and percussion) - something to bear in mind for the future. However this builds well to strong end.
Overall, many admirable moments with good energy and spirit. Some basic issues did affect the convincingness of this performance, but the shaping was a real positive for me. Thank you MD + band.
